Hello Humbert,

Here is the data on the radial
beams for the spot light which
focuses 7m away and has a diameter
of 2.8m. It is in the same format
as for Tycho and Uraniz. (FAX 22/5/91) As with
the previous spotlights, it has 12 radial
arms and the same size centerplate.
I'll send the cutting pattern for this one
tomorrow. Perhaps we can call it
"Ptolemy" - after the Greek astronomer.

Lorraine
