Affaire : THEATRE DE LA PLEINE LUNE

Objet : FULL MOON OF 16 MAY

M E S S A G E

PLEASE FIND ENCLOSED PHOTOCOPIES
OF THE PHOTOS OF PROTOTYPE WE HAVE
BUILT LAST WEEK.

I SEND THE PHOTOS BY POST.
WE HAD NOT ENOUGH TIME TO TEST
THE LIGHT, AND TO SEE THE POINT'S
MOVEMENT ON THE STAGE DURING
THE NIGHT. NEVERTHELESS, WE WOULD
SEE THAT THE ORIENTATION PRINCIPLE
WAS GOOD.

FOR THE NEXT FULL MOON, WE WILL
GO TO BUILD 15 PARABOLAS.
AFTER THE PROTOTYPE, THERE IS
SOME REMARKS:

- TO MAKING PROBLEMS, THE
RAILS MUST BE STRAIGHT EVEN

IF THE POINT ON THE STAGE
WILL MOVE A LITTLE.

- THE MOVEMENT'S LENGTH
MUST BE REDUCED TO 2m
MAXIMUM.

WHAT DO YOU THINK ABOUT
THESE TWO REMARKS?

IN THIS CASE, WHAT IS THE
TOLERANCE OF THE POINT ON THE STAGE?

TO CAN I GIVE YOU THE POSITION
OF 15 PARABOLAS ON THE THEATRE,
CAN YOU SEND ME THE GEOMETRY
OF THE THEATRE WITH A FILE
OF GEOMETRIC POINTS.

THE NEXT FULL MOON IS THE
16 MAY.

REGARDS

NICOLAS.
